PrestaShop:

1. Navigate the Modules, finding humm. From the configure drop down, select uninstall.

Configure		
	Uninstall .	
	Disable	
	Disable Mobile	
	Reset	

Removing Widgets:

Shopify:

Price-Info Widget: Within your Themes directory in your Shopify Admin, select Edit Code in your actions remove the script for the price info widget. (use Control + F, type "humm" to find on the section the widget has been loaded on). Typically the widget is loaded on the product-template.liquid section.

Payment Tile: Within the code of your theme, select Assets. Find the humm_payment_tile file, then click on the delete option. Find the section which the tile widget was added (typically footer.liquid within Sections), which you can find with Control + F "humm" then remove the line of code.

Banners: Within your Pages directory, select pages. From the list, select the page related to humm, then select delete page at the bottom of the page. To remove the link to the page from your menu's, select Navigation from the Online Store category. Select the menu the humm link is located, then delete the item.

BigCommerce:

Product Page Widgets need to be removed from the theme files:

- 1. Go to Storefront>Themes, click the Advanced dropdown and click Edit Theme Files.
- 2. Locate the product-view.html file and open it:
- 3. Control + F, search for Humm within the code to find the Humm script and remove it.

Magento:

If the plugin is removed, the widget should also be removed.

To double check the Price-Info Widget has been removed:

1. Find the view.phtml from the following location in your hosting (Magento installed Folder) and open it with your desired text-editor

YOUR_MAGENTO_FOLDER/app/design/frontend/rwd/YOUR_TEMPLATE_FOLDER/template/catalog/product/ view.phtml

2. Control + F, search for 'Humm' within the code to find the Humm script and remove it.

Assistance:

For any assistance with the removal of the plugins or widgets, please reach out to <u>henry.kamleitner@hummgroup.com</u> or <u>pit@shophumm.co.nz</u>.
